

YOUR CRO LOCAL PARTNER IN **A CHANGING CLINICAL LANDSCAPE**

SCOPE International (UK) Ltd is a Manchester-based full-service clinical research organisation. Built upon 20-year corporate history of running clinical studies across Europe and USA, our mission is to support companies to bring their product to market safely. Over the years this has included product registration for drugs and drug device combinations with a strong focus on women's health, asthma, epilepsy, pain and anti-infectives.

SCOPE has long recognised that the UK is a centre for innovation in the pharma, biotech and medical technology fields; keeping up to date with UK regulatory rollout of Regulation (EU) No. 536/2014 and planning for Brexit has been a key focus for our team.

Central to this is the implementation of new technology and tools, using our proprietary clinical trial management system In**SIGHT** to support our sponsor's needs.

We are here to help manage local UK and Eire projects and internationally through these changing times with links to our large multidisciplinary team distributed in different offices of the company.
